STAN VERBRUGGEN

Automation Engineer & Full-Stack Developer

Oosterzele, Belgium | +32 477 27 70 64 | stanverbruggen@protonmail.com | sjvportfolio.netlify.app | GitHub | LinkedIn

PROFESSIONAL EXPERIENCE

Automation Engineer at Attentia *2026 – Present*

- Build n8n automations that replace repetitive manual work
- Build MCP servers and personal work agents for colleagues, and design multi-agent flows
- Provide 2nd-line development support: investigate and fix issues in internal systems
- Check that bank transfers process correctly through the systems, and optimise those systems

Functional Analyst & Lead Developer at RF-Technologies *2025 – 2026*

- Owned business-critical enterprise applications end-to-end: functional analysis, technical lead on implementation, and production debugging, including an operational workflow platform and a data & analysis tool
- Built supporting modules, including visual discount-rule management and inventory tracking, plus an automated Azure DevOps CI/CD test pipeline for both applications
- Digitized manual approval workflows with Power Automate & SharePoint, and built an AI-driven automation (n8n + Claude API) that reads tender documents shared in Microsoft Teams and converts them into quote information
- Built production MCP servers on Azure App Service with per-user Entra OAuth, giving AI agents secure access to internal APIs and data
- Explored a Microsoft Fabric medallion architecture with AI-agent data querying as a forward-looking data analytics initiative

Software Developer Intern at Brightest *2025*

- Co-built the Brightest Test Automation Framework: a React/Node.js/Firebase web app that lets non-technical users create automated website tests, with AI-generated test code via the OpenAI API

Earlier experience (alongside studies) *2021 – 2025*

- Student Admin Assistant, FOD Wapens: managed permits, processed data, handled archiving
- Student Logistics Assistant, Hoppy: maintained and transported shared scooters/bikes

PERSONAL PROJECTS

Time2Bill *Flutter / Firebase · 2025*

- Cross-platform time tracking & invoicing app with automated billing, financial analytics and UBL/Peppol e-invoicing, streamlining the full admin workflow from time tracking to payment

Battery-swap Route Manager (concept) *.NET Core / React Native · 2025*

- Concept route planner for battery-swap crews, modelled on 23 regions: a .NET Core API with a React Native app, role-based views, vehicle tracking per zone and swap-round planning

Personal agent team *Claude Code / MCP / Obsidian · 2026*

- Multi-agent assistant on Claude Code: a manager agent routes work to specialists (job search, finance, mail, LinkedIn, machine health, a small dev team), with shared memory in an Obsidian vault and a generated skill registry

Recruitment CRM (client project) *Vue 3 / Firebase / Capacitor · 2026*

- Production CRM for a field-marketing and recruitment agency: shift planning with approval, recruitment funnel, Leaflet coverage map, three roles across offices, Firestore rules covered by an emulator test suite, iOS and Android builds

SKILLS

Frontend: React, Vue, TypeScript, JavaScript, HTML/CSS, Flutter

Backend: .NET, C#, Node.js, REST APIs, SQL Server

Cloud & DevOps: Azure (Key Vault, DevOps Pipelines), Docker, CI/CD, Git/GitHub

AI & Automation: Claude API, OpenAI API, n8n, Power Automate

Testing: xUnit, Jest, Playwright, automated test frameworks

Databases: SQL Server, Firebase/Firestore, MySQL

Languages: Dutch (native), English (fluent), French (intermediate)

EDUCATION & CERTIFICATIONS

Associate Degree in Software Development (Graduaat Programmeren) *2021 – 2025*

Oracle Database 12c: SQL Fundamentals Certification *2022*
