

Stan Verbruggen

Full-Stack Developer

Ghent, Belgium (Relocating to Dublin, Q4 2026) | +32 477 27 70 64 | stanverbruggen@protonmail.com | sivportfolio.netlify.app | linkedin.com/in/stan-verbruggen-67b928198

EU Citizen — full working rights for Ireland, no visa sponsorship required

Profile

Full-Stack Developer with hands-on experience across software delivery and technical/functional analysis. Experienced in React/Vue, .NET Core/Node.js, SQL Server, Azure, CI/CD, and AI-driven workflow automation with n8n and the Claude API. Skilled at translating business requirements into technical specifications and shipping production-ready features in enterprise environments. Relocating to Dublin in late 2026.

Core Skills

Analysis: requirements gathering, stakeholder management, technical specifications, user stories, production support

Frontend: React, Vue, TypeScript, JavaScript, HTML/CSS, Flutter

Backend & Data: .NET, C#, Node.js, REST APIs, SQL Server, Firebase/Firestore, MySQL

Cloud & DevOps: Azure DevOps Pipelines, Azure Key Vault, Docker, CI/CD, Git/GitHub

AI & Automation: n8n, Claude API, OpenAI API, Power Automate

Testing: xUnit, Jest, Playwright, automated test pipelines

Languages: Dutch (native), English (fluent), French (intermediate)

Professional Experience

Functional Analyst & Developer | RF-Technologies (Belgium)

September 2025 – Present

- **AI & Automation:** Built and deployed an automated document-intake workflow (n8n + Claude API) that parses tender documents shared via Microsoft Teams, reducing manual sales-to-quote turnaround.
- **Enterprise Full-Stack Development:** Developed and maintained business-critical modules across Vue, TypeScript, .NET Core, and SQL Server, including visual discount-rule management and inventory visibility tracking.
- **Requirements & Technical Analysis:** Act as a technical liaison between business stakeholders and developers, translating operational needs into technical specifications, user stories, and implementation plans.
- **Process Optimisation:** Migrated manual approval workflows to Power Automate and SharePoint, reducing administrative overhead and improving traceability across recurring business approvals.
- **DevOps:** Added automated test steps to Azure DevOps CI/CD pipelines for core applications, improving release feedback and reliability before deployment.

Software Developer | Brightest (Belgium)

February 2025 – May 2025

- **Framework Architecture:** Co-designed and developed the Brightest Test Automation Framework, a React, Node.js, and Firebase web application for no-code automated test creation.
- **AI Integration:** Implemented OpenAI API integrations to generate executable test code from non-technical user input.
- **Business Impact:** Helped streamline test creation and reduce testing overhead through no-code authoring, AI-assisted generation, and visual element selection.

Technical Portfolio & Personal Projects

Time2Bill | Flutter, Firebase, UBL/Peppol

2025

- Built a cross-platform time tracking and invoicing app for freelancers and small businesses — project management, real-time timers, invoice generation, financial analytics, and UBL/Peppol e-invoicing — streamlining the workflow from time registration to payment follow-up.

Micro-Mobility Route Manager | Personal project, informed by Hoppy field experience — .NET Core, React Native, TypeScript, SQL Server

2025

- Built a personal prototype for micro-mobility fleet route management, drawing on direct field experience from battery-swap logistics.
- Modelled multi-region fleet coordination concepts and role-based workflows for admins, fleet managers, and field staff, including low-battery detection and boundary monitoring.

Earlier Experience

File Administrator, Federale Overheidsdienst Wapen (Jul 2021 – Aug 2024) · Student Logistics Assistant, Hoppy (Aug 2021 – Aug 2025) · IT Consultant, BEEGO (Jan – Aug 2024) — roles held alongside studies, covering administrative records handling, field logistics, and end-user IT support.

Education & Certifications

Associate Degree in Software Development (Graduaat in Programmeren) — EQF Level 5, aligned with Irish NFQ Level 6. Graduated 2025.

Oracle Database 12c: SQL Fundamentals — Oracle, 2022.
