

STAN VERBRUGGEN

Functional Analyst & Full-Stack Developer

Oosterzele, Belgium | +32 477 27 70 64 | stanverbruggen@protonmail.com | [sivportfolio.netlify.app](#) | [LinkedIn](#)

PROFILE

Full-stack developer who made the deliberate move into a Functional Analyst role, bridging business requirements and technical implementation across enterprise applications and independently built projects. Comfortable across the stack, from React/Vue frontends to C#/.NET/Node.js backends and SQL Server, with hands-on experience in cloud security (Azure Key Vault) and AI-driven workflow automation (n8n, Claude API). Brings a self-driven grasp of modern AI-assisted development into team projects. Looking to grow further within a collaborative, international development team.

PROFESSIONAL EXPERIENCE

Functional Analyst & Developer at RF-Technologies 2025 – Present

- Own business-critical applications end-to-end: functional analysis, technical lead on implementation, and production debugging, including SHIELD (operational workflow platform) and BIRD (data & analysis tooling)
- Built supporting modules including Discount Tree (visual discount-rule management) and StockDetail (inventory tracking), plus an automated Azure DevOps CI/CD test pipeline for SHIELD & StockDetail
- Digitized manual approval workflows with Power Automate & SharePoint, and built an AI-driven automation (n8n + Claude API) that reads tender documents shared in Microsoft Teams and converts them into quote information
- Explored a Microsoft Fabric medallion architecture with AI-agent data querying as a forward-looking data analytics initiative

Student Developer at Brightest 2025

- Built the Brightest Test Automation Framework: a React/Node.js/Firebase web app letting non-technical users create automated tests, using the OpenAI API for AI-generated test code, cutting testing costs by 65% and speeding up test creation by 80%

Earlier experience (alongside studies) 2021 – 2025

- Student Admin Assistant, FOD Wapens: managed permits, processed data, handled archiving
- Student Logistics Assistant, Hoppy: maintained and transported shared scooters/bikes

PERSONAL PROJECTS

Time2Bill Flutter / Firebase · 2025

- Cross-platform time tracking & invoicing app with automated billing, financial analytics and UBL/Peppol e-invoicing, cutting administrative tasks by 60% and improving payment cycles by 45%

JaqAI Python · 2025

- Exploratory project to build a custom language model from scratch in Python, with a hands-on deep dive into tokenization, model architecture and training pipelines to understand LLMs at a fundamental level

Portfolio Website React · 2025

- This site, designed and built with smooth animations, optimized performance and full responsiveness

SKILLS

- Frontend:** React, Vue, TypeScript, JavaScript, HTML/CSS, Flutter
- Backend:** .NET, C#, Node.js, REST APIs, SQL Server
- Cloud & DevOps:** Azure (Key Vault, DevOps Pipelines), Docker, CI/CD, Git/GitHub
- AI & Automation:** Claude API, OpenAI API, n8n, Power Automate
- Testing:** xUnit, Jest, Playwright, automated test frameworks
- Databases:** SQL Server, Firebase/Firestore, MySQL
- Languages:** Dutch (native), English (professional), French (intermediate)

EDUCATION & CERTIFICATIONS

Graduaat in Programmeren (Professional Bachelor, short-cycle) 2021 – 2025

Oracle Database 12c: SQL Fundamentals Certification 2022
